4. Outturn – Road	\$7.88	\$7.88	\$7.88	\$7.88	\$7.88
5. Monthly Storage					
Oct 2023 – Aug 2024	\$2.05	\$2.05	\$2.05	\$2.05	\$2.05
Sept 2024	\$4.50	\$4.50	\$4.50	\$4.50	\$4.50
6. Monthly Carry					
Oct 2024 – Nov 2024	\$4.50	\$4.50	\$4.50	\$4.50	\$4.50
Dec 2024 onwards	\$3.35	\$3.35	\$3.35	\$3.35	\$3.35
7. Throughput	POA	POA	POA	POA	POA

* Major Wheat Grades are H2, APW1 and ASW1

** Minor Wheat Grades are all non-major wheat grades.

Fee Type	Request	All Grains	
8. In Store Transfers Client to Client	Seller to Pay	\$0.45	per Tonne
9. Sample Request	Stack/Outload Sample	POA	per Sample

Outturn Efficiency	Road	Rail
10. (a) W/end, Night, Public Holiday	\$2.00	\$1.00
(b) < 200mt/order	POA	-
(c) Failure to outturn	\$5.00	\$5.00
(d) Container loading fee	\$1.50	-

Miscellaneous	Charge
11. Pesticide Residue Free (PRF)	No Charge
12. Re-delivery Fee	\$9.00

Explanatory Notes:

1. Receival Fee:

Applies to receival tonnes (pre shrunk)

This charge incorporates the services of receival ex-grower or sources external to GrainFlow, sampling and classification on delivery, weighing, inward elevation, segregation and recording and provision of delivery and transaction information at a GrainFlow Grain Centre.

Malt Barley fee applies to any non-feed grade (BAR1/BAR2/BAR3/BAR4) barley segregation.

2. Shrink:

A shrinkage factor in accordance with the schedule will be deducted from each load at the time of initial delivery into the Company system. The receival tonnage less the shrinkage deduction will be credited to the stock account of the owner.

3. Rail Outturn Fee:

Covers the services involved in loading of rail wagons. The rail outturn fee will be invoiced at month end following the outturn.

4. Road Outturns:

Covers the services involved in loading of road vehicles. The road outturn notice must include destination address details to assist with compliance requirements.

Road outturn orders must be given by 2pm on Thursday prior to the week of outturn. The road outturn fee will be invoiced at month end following the outturn.

5. Monthly Storage Fee:

The storage fee covers condition monitoring of grain stocks, ongoing phosphine or ProFume fumigation treatment in accordance with standard GrainFlow fumigation regime and maintenance and provision of grain stock information. Should a client require extra ordinary treatments to its grain the client will meet costs involved in the provision of such treatments.

The first monthly storage charge commences on first day of month immediately after delivery and is charged thereafter to the opening stock balance on the first day of each month and ending on the 1st September 2024.

6. Monthly Carryover Fee:

The carryover fee covers services outlined above for storage fee and also includes any costs for repositioning of stock in readiness for coming harvest and the allowance for increased risks for long-term grain storage.

Carryover storage charges commence on 1st October 2024 and are charged monthly thereafter until out turn of stock.

7. Throughput Service:

Pricing is readily available on case by case basis and will be dependent on sampling, weighing and storage requirements prior to outloading. Times and dates for delivering grain to a GrainFlow Grain Centre must be pre-arranged with the site management.

8. In Store Transfers Client to Client

Charges to apply to both internet and manual transfers. The seller will be invoiced at end of month. There is no charge for grower transfers to clients.

9. Sample Request:

Sample requests will be priced once the details of the request are submitted to GrainFlow. Stack samples supplied will be from the 500mt running samples collected at the GrainFlow laboratory during harvest. Courier charges are to be paid for by the client.

10. Outturn Efficiency - Conditional Out-loading Charges

a) Weekend / Night / Public Holiday Charge

Weekend surcharge

It is based on the commencement to load a train or a road truck. It applies where loading commences after 00:00 hours on a Saturday and ends where commencement to load starts after 00:00 hrs on a Monday

Therefore as an example, a train or truck that commences to load at 23:00 hrs on a Friday will not incur this charge but a train or truck commencing to load at 00:05 on a Saturday would incur this charge.

Night loading charge

It is based on the commencement to load a train or a road truck. It applies where loading commences between the hours of 19:00 hours and 07:00 the following morning.

Therefore as an example, a train or truck that commences to load at 18:50 hrs on any day will not incur this charge but a train or truck commencing to load at 19:00 on any day would incur this charge.

Public Holidays

It is based on the commencement to load a train or a road truck. It applies where loading commences after 00:00 hours on a public holiday and ends where loading starts after 00:00 hrs on the following non public holiday.

Therefore as an example, a train or truck that commences to load at 23:00 hrs on a Good Friday Eve will not incur this charge but a train or truck commencing to load at 00:05 on Good Friday would incur this charge.

Public holidays are defined by the gazetted public holiday in the state of operation.

Commencement to load starts at commencement to open lids on wagons or tarps on trucks

Cumulative penalty

Please note that Public holidays, Weekends and Night loading penalties may all apply to a specific loading event. For example, train loading at 01:00 on Good Friday would incur both public holiday and night loading charges. ***Commencement to Load***

Commencement to load starts when wagon lids opened for rail or at tare weighing for trucks.

b) Less than 200mt/order

If grain already in place for outturn or if outturn can be delayed to combine with other orders of sufficient tonnes this charge will not apply.

c) Failure to outturn – Road and Rail

Where a client places an order for defined tonnage and fails to present the transport capacity to load the tonnage by the order completion date. The fee will be charged on the outturn tonnage shortfall.

d) Top Loading Container Fee

Where the client requires outturn via road into top loading containers an extra charge to position the grain into the over rail bins to facilitate loading is applicable.

11. Pesticide Residue Free (PRF)

GrainFlow has a policy of not receiving grain treated with contact pesticide. GrainFlow will not treat the grain it receives, stores, outturns or throughputs with a contact pesticide. GrainFlow does not test on receipt for the presence of prior grain treatments. The client can request at its cost samples for testing to validate PRF status.

12. Re-delivery Fee

The fee applies to Grain which is outturned from GrainFlow sites and which, having been rejected at its destination for reasons outside the control of GrainFlow, is tendered for re-delivery to any GrainFlow site.

The fee will apply if Grain is rejected at destination for quality non-conformance and subsequent sampling upon return to a GrainFlow site indicates that it is within specification.

Important Dates:

Harvest period is 1st October 2023 to 31st of January 2024 for winter crop.

'Season grain' is grain delivered between 1st October 2023 and 1st October 2024 unless mutual agreement on a re-grade.

Invoicing:

Receival & Throughput Fees:

Invoicing for all receival and throughput fees will be on tonnes received.

Other Fees:

All other fees will be based on receival tonnages less the shrink %.

Payment Terms:

Payment terms are 30 days from issue date of invoice.
